## Lab 8:

1.

## Primary Keys:

Actors: ActorName, since the Screen Guild requires that no two names are the same.

Movies: Mid, which uniquely identifies each movie, even if the names are the same

Directors: DirectorName, the Directors Guild insures that no two names are the same

```
ActedIn: ActorName, mid, a composite key that identifies the actor and the ID of the
movie that he acted in
Directed: DirectorName, mid a composite key that identifies the director and the ID of
the movie that he acted in
2.
CREATE TABLE Actors (
      ActorName text NOT NULL,
